C&T INGREDIENT RESOURCE SERIES

AHA AND CELLULITE PRODUCTS: How They Work

The editors of *Cosmetics & Toiletries*® magazine have collected papers from leading experts to get you the latest information on these products. Included is research by Walter P. Smith, PhD on the effects of alpha hydroxy acids and of four commercially available cellulite creams. Complementing these are a paper by Raoul Hermitte, contrasting retinoids and AHAs, and a study by Ronald DiSalvo comparing various current treatments for cellulite.

This book is fully indexed to help you locate the information you need to satisfy your curiosity about these new "miracle treatments" and which ones work.
